TO THE READER

Ralph B. Thompson retired in August 1981 after serving as editor of the *Florida Statistical Abstract* for nine years. The Bureau of Economic and Business Research has missed his leadership and his exuberance during the preparation of this 1982 edition. In addition to *Abstract*, Ralph served as editor of *Business and Economic Dimensions* and *Economic Leaflets* and taught for the Department of Marketing. He willingly spent much time with Bureau staff members and with students helping them with projects and serving as model, teacher, and friend. He has entered this new phase of life with the same enthusiasm and good spirit he showed for his work in the Bureau and in the classroom.

This edition of the *Florida Statistical Abstract* is the sixteenth and seeks to continue a tradition of providing as much comprehensive and timely economic and demographic information about Florida as possible. Every effort is made to obtain and publish in the *Abstract* the most up-to-date information possible. However, because these data have been collected by many entities--state and federal, private and public--they may cover activities occurring in different periods of time. It is impossible to insure uniformity, but time periods are always stated in the tables.

When the statistics on some subject have not been updated at the time an edition of the *Abstract* is ready to go to press, they may not be repeated. The user is encouraged to utilize data in earlier editions. This is particularly true for census data. At the back of this edition is an index of census tables appearing in previous editions.

The first part of the *Abstract* includes those tables that present information about the characteristics of the population: number of people, housing, health, education, income, employment, and welfare. The next three parts refer to establishments engaged in economic, social, and political activities.

Sections 9.00 through 23.00 present information about establishments rather than individuals. These establishments are classified by the type of activity in which they are engaged according to the Standard Industrial Classification (SIC). This system has been developed by the U.S. Office of Management and Budget and is published in the *Standard Industrial Classification Manual*, 1972. The *Manual* defines an establishment as "an economic unit generally at a single physical location where business is conducted, or where services or industrial operations are performed." An establishment is not necessarily identical with an enterprise or company which may consist of more than one establishment. Both profit making and not-for-profit organizations are included as well as agencies of the federal, state, and local governments. Major industries are assigned two-digit SIC codes: 20 through 99; subdivisions are classified by three- and four-digit codes.

For example, the construction industry is divided into the major group, SIC 15, "building construction"; group SIC 16, "construction other than building construction"; and group SIC 17, "special trade contractors." Group 15 is in turn divided into group 152--"general building contractors, residential buildings," group 153--"operative builders," and 154--"general building contractors, non-residential." Finally, group 152 is subdivided into 1521--"general contractors, single family houses," and 1522--"general contractors, other than single-family."

The last section of the *Florida Statistical Abstract* contains exhibits of a comparative nature: economic and social trends. In Section 24.00 are a number of time series showing the fluctuations of such major economic activities as income, prices, and employment. Measures of the quality of life in the state and metropolitan areas are given in Section 25.00.

Fiscal years. In 1976 the federal fiscal year was changed to extend from October 1 of one year through September 30 of the next. The fiscal year of the State of Florida is July 1 of one year through June 30 of the next. In a few cases where a reporting organization, particularly one of the Florida cities, has a different fiscal year, the months included are stated in the table.

Covered employment and payroll. A number of tables are composed of statistics relating to employment and payroll covered by the unemployment compensation law of Florida and the federal government. These data are supplied in unpublished form by the Bureau of Research and Analysis, Division of Employment Security, Department of Labor and Employment Security, State of Florida. Readers should keep in mind that some types of employees are not covered by the unemployment compensation law. An explanation of the limitations of these data is to be found in the introduction to Section 6.00.

Computer printouts of Abstract data. Much of the information on tables in the Florida Statistical Abstract is on computer tapes. Computing was done utilizing the facilities of the Northeast Regional Data Center of the State University System of Florida, located on the campus of the University of Florida in Gainesville.

Additional information. The sources of data are listed at the bottom of each table. Suggestions for locating sources or obtaining more information are made in "Guide to Sources of Statistics" at the end of the book.

The preparation of this edition of the Abstract was shared by many members of the staff of the Bureau of Economic and Business Research. Susan Floyd served as managing editor and directed the collection of data sources. Peggy Rosander was responsible for the required statistical computations and for coding and auditing the data. They were assisted by statistical aides Jerri Norris and Ava Hagan, student assistants Darby Malickson, Laura Pastore, Dean Richstone, William Wells, Jr., John Springstead, Ricky Campbell, Thomas DeGroot, Roy Willis, Randy Weitzel, Grace Johnson, Robert Haas, Scott Smith, and Kevin Martin, and graduate students Harold Smith, Glenn McIsaac, and Pam Lanham. Janet Fletcher, Barbara Jacobson, Pam Middleton, and Kathy Butts provided clerical assistance. Evan Eldridge supervised data processing and created the computer maps. Leo Wierzbowski was responsible for computer programming; Genevieve Floyd was the data processing coordinator, assisted by Jim Delaune, Donald Morrison, Carrol Gullen, Patricia Dickerson, Dee Ann Benning, David Henderson, Craig Jones, Robert Parsons, Steven Seidenburg, and Ann Star. Nellie Widener supervised data entry, assisted by Phyllis Lee and student assistants Mark Burns, Glynis Duncan, Lindy Harmon-Sherman, and Linda Pepple. Dorothy Evans prepared one-half of the tables, the chapter introductions, and the index on the word processor. Kathy Cox prepared the maps and Steve Fasnacht, the cover. Ann Pierce and Charles Morrison provided editorial consultation and assistance. The staff of the University Presses of Florida provided production assistance and handles distribution.

We would be happy to receive suggestions for improving the usefulness of the Florida Statistical Abstract to you and your organization.

PROVISIONAL ESTIMATES OF SOCIAL, ECONOMIC, AND HOUSING CHARACTERISTICS

In Spring 1982, the U.S. Bureau of the Census published a supplementary report, Provisional Estimates of Social, Economic, and Housing Characteristics (PHC80-S1-1). This report was designed to provide an early release of sample data from the 1980 Census of Population and Housing on social, economic, and housing characteristics for the U.S. as a whole, each state, and standard metropolitan statistical areas (SMSAs) with a population of 1,000,000 or more. In this special introductory section of Abstract, provisional data from the report are presented for Florida and the U.S. The census report contains data for 38 U.S. SMSAs, three in Florida: Ft. Lauderdale-Hollywood, Miami, and Tampa-St. Petersburg. Because of the constraints of space and because the sample size was small, these SMSAs are not included in the Abstract, tables. Users are referred to the census source itself, which can be found in U.S. government depository libraries or can be ordered from the Government Printing Office. The libraries are listed in "Guide to Sources of Statistics" at the back of this book.

The data in this section are based on a special eight percent subsample of the full census sample questionnaires, or approximately one and one-half percent of the total national population. Later publications and summary tape files will include estimates for these same characteristics based on the full census sample. The figures in this section are provisional and may differ somewhat from those based on the full sample. When they become available, the data in the final reports and tape files should be used instead of these data.

Final data covering the subjects in this section for Florida and its subareas will appear in Summary Tape Files 3, 4, and 5. The first of these is scheduled for release in Fall 1982 (too late for use in this Abstract). All of the tapes will be available for access at the University of Florida Library and at various other places around Florida. These sample data will also appear in two printed reports: Characteristics of the Population, General Social and Economic Characteristics (PC80-1-C) and Characteristics of Housing Units, Detailed Housing Characteristics (HC80-1-B). These reports will probably not be available until spring or summer of 1983. Future editions of Abstract will include much of this sample census information.

TABLE 1A.01. POPULATION AND HOUSING: PROVISIONAL ESTIMATES OF SOCIAL, ECONOMIC AND HOUSING CHARACTERISTICS IN FLORIDA AND THE UNITED STATES, APRIL 1, 1980

ITEM	FLORIDA	UNITED STATES
	GENERAL, FAMILY, AND FERTILITY CHARACTERISTICS

A/ POVERTY THRESHOLDS VARY BY SIZE OF FAMILY, NUMBER OF CHILDREN, AND AGE OF HOUSEHOLDER. THE POVERTY THRESHOLD FOR A FAMILY OF FOUR WAS $7,412 IN 1979. INMATES OF INSTITUTIONS, MEMBERS OF THE ARMED FORCES LIVING IN BARRACKS, COLLEGE STUDENTS LIVING IN DORMITORIES, AND UNRELATED INDIVIDUALS UNDER 15 YEARS ARE EXCLUDED FROM THE POPULATION FOR WHOM POVERTY STATUS IS DETERMINED.

1/ PERSONS LIVING IN URBANIZED AREAS AND IN PLACES OF 2,500 OR MORE OUTSIDE URBANIZED AREAS.

2/ A CENTRAL CITY OR CITIES AND SURROUNDING CLOSELY SETTLED CONTIGUOUS TERRITORY (URBAN FRINGE) THAT TOGETHER HAVE A MINIMUM POPULATION OF 50,000.

3/ POPULATION NOT CLASSIFIED AS URBAN.

4/ PERSONS LIVING ON PLACES FROM WHICH SALES OF FARM PRODUCTS AMOUNTED TO AT LEAST $1,000 IN 1979.

5/ ONE PERSON IN EACH HOUSEHOLD IS DESIGNATED AS HOUSEHOLDER, USUALLY A PERSON IN WHOSE NAME THE HOME IS OWNED OR RENTED. A FAMILY HOUSEHOLDER IS LIVING WITH ONE OR MORE RELATIVES; A NONFAMILY HOUSEHOLDER IS LIVING ALONE OR WITH NONRELATIVES.

6/ A WORK DISABILITY IS A HEALTH CONDITION (PHYSICAL AND MENTAL) WHICH HAS LASTED 6 OR MORE MONTHS AND WHICH LIMITS THE KIND OR AMOUNT OF WORK THAT CAN BE DONE.

7/ INCLUDES UNITS CLASSIFIED AS BOATS, TENTS, VANS, ETC.

8/ ONE-FAMILY HOUSES ON LESS THAN 10 ACRES WITHOUT A COMMERCIAL ESTABLISHMENT.

9/ THE SUM OF PAYMENTS FOR MORTGAGES, DEEDS OF TRUST, OR SIMILAR DEBTS ON THE PROPERTY; REAL ESTATE TAXES; FIRE AND HAZARD INSURANCE ON THE PROPERTY; UTILITIES; AND FUELS.

10/ RENTER-OCCUPIED HOUSING UNITS EXCEPT ONE-FAMILY HOUSES ON 10 OR MORE ACRES.

NOTE: THESE DATA ARE ESTIMATES BASED ON A SAMPLE AND ARE PROVISIONAL. SEE THE INTRODUCTION TO THIS SECTION.

1.00

POPULATION

The Census of Population taken once every ten years by the U.S. Bureau of the Census provides basic statistics about population. Data about Florida from the 1980 Census are included in this Abstract. These data have been released by the Census Bureau in printed and computer tape formats. The printed report Number of Inhabitants, Florida (PC80-1-A11) and the Summary Tape Files 1 and 2, Florida provide information from the questions asked of 100 percent of the population. This Abstract contains summary tables with county and city data on age, race, Spanish origin, sex, marital status, and urban/rural residents. Race and Spanish origin data are still provisional and will be revised when the sample data are tabulated. The tape files contain data for subcounty areas in too much detail to be presented in this Abstract. Readers who need census tract or block data can contact the University of Florida Library (or others in the local area who have purchased the tape) for direct access.

In order to provide an early release of data from the sample questions, the Census Bureau released Provisional Estimates of Social, Economic, and Housing Characteristics (PHC80-S1-1). This publication is discussed and abstracted in Section 1A.00 of this book.

In 1980 the first efforts by the Census Bureau were made to collect and publish counts of nonpermanent residents by the state and county in which they were staying at the time of the census. These counts are cross-classified by the state of "usual" residence. Since 1790 persons enumerated in a census are attributed to the address they indicate as their usual residence, that is, where they live and sleep most of the time. This place may not be the person's legal or voting residence, although it usually is. Under this definition of residence, a person staying in Florida on April 1, 1980 who indicated that his or her usual residence was New York City would have been attributed to New York for census purposes. In 1980, for the first time, a separate count of such persons was made and released in a supplementary report: Nonpermanent Residents by States and Selected Counties and Incorporated Places (PC80-S1-6). These data for Florida are included on Tables 1.50, 1.51, 1.52, and 1.53. Only nonpermanent residents staying in housing units occupied entirely by persons with a usual home elsewhere are included. Persons staying in the house of a permanent resident are not included, nor are persons staying in hotels, motels, or campgrounds. Also included are persons whose nonpermanent residence was within the same census district office as their usual residence.

At the back of this issue of the Abstract will be found an index of all Census information from the 1970 Census of Population and other recent censuses to which readers may refer for comparison.

In addition to the decennial censuses the Census Bureau issues a series of Current Population Reports, known as P-Series. These contain national, regional, and sometimes state population statistics resulting from periodic surveys, special censuses, and cooperative estimation and projection efforts between the individual states and the Census Bureau. A recent release in this series is Estimates of the Population of States, by Age: July 1, 1981 (Series P-25, No. 913).

Between census years estimates of the population of the state, counties, and municipalities of Florida are made by the Population Program, Bureau of Economic and Business Research (BEBR), University of Florida. These are released annually in *Florida Estimates of Population*. A revised series of these estimates for the 1970s appears in Table 1.20. Extreme caution must be exercised when deriving annual changes from successive estimates. Calculating such changes can lead to inaccurate conclusions regarding population growth, especially for small places. The best base for any estimate of population change is generally the most recent census enumeration.

Projections of the population of Florida counties and estimates of such demographic characteristics as age, race, sex, and housing are made by the BEBR Population Program and published in *Population Studies*. For the first time, the BEBR has made projections of population by age for large Florida counties.

Data on veterans come from the U.S. Veterans Administration in Washington, which releases reports on the age, location, and period of service of veterans. Data on aliens are from the U.S. Immigration and Naturalization Service. Voting-age population is presented in Section 21.00.

Definitions and Area Classifications. Persons in the armed services are counted as residents of the area in which their installations are located. College students are considered residents of the communities in which they reside while attending college.

Counties and municipalities are political entities, the boundaries of which are determined by legislative action. But from a sociological point of view the community of which a person considers himself or herself to be a part may not correspond to such a legal entity. Terms like "Greater Jacksonville" or "the Miami area" are used to indicate the real community. People do not hesitate to cross city or county limits or even state lines to work, to buy or sell, or to seek cultural, medical, recreational, or social services. For this reason the U.S. Bureau of the Census has designated communities known as standard metropolitan statistical areas (SMSAs). The SMSA is defined generally as "a large population nucleus, together with the adjacent communities which have a high degree of economic and social integration with it." Definitions are made in terms of entire counties to facilitate the gathering and comparison of statistical data. SMSAs are designated and defined by the U.S. Office of Management and Budget. Each SMSA has one or more central county containing an urbanized area with at least 50,000 inhabitants. An SMSA may also include contiguous counties with close economic and social ties with the central county. The contiguous counties must have a certain level of commuting to the central county and must meet certain standards of population density, urban population, and population growth. Population living in SMSAs may be referred to as the metropolitan population. There are 18 designated SMSAs in Florida. See Table 1.65 for population figures and the map at the front of this book for the list of counties in each Florida SMSA.

New standards for designating SMSAs have been developed and will be applied to areas existing on January 1, 1980 after the data on commuting flows become available from 1980 Census tabulations. At that time the boundaries, definitions, and titles for all SMSAs will be reviewed.

For various purposes, counties are frequently grouped together into regions. As defined by the BEBR, a market region represents those counties from which a metropolitan area draws trade and in which its lending institutions make loans. A map of market areas is to be found in Section 1.00.

Agencies of the state government have designated various groups of counties as being parts of districts. There are eleven planning districts, each containing several counties which have common interests and needs for planning development in the area. A map in this section shows the latest pattern of county assignment. There are also Health and Rehabilitative Services Districts enumerated on a map in Section 7.00 and crop districts (map in Section 9.00).

(X) NOT APPLICABLE.

1/ FIGURES HAVE BEEN ADJUSTED TO CONSTITUTE A SUBSTANTIALLY CONSISTENT SERIES BASED ON INCORPORATED PLACES OF 2,500 OR MORE PERSONS WITH ADDITIONAL AREAS DEFINED AS URBAN UNDER SPECIAL RULES.

2/ THE CURRENT URBAN DEFINITION DEFINES THE URBAN POPULATION AS ALL PERSONS LIVING IN URBANIZED AREAS AND IN PLACES OF 2,500 OR MORE PERSONS OUTSIDE URBANIZED AREAS. AN URBANIZED AREA COMPRISES AN INCORPORATED PLACE AND ADJACENT DENSELY SETTLED SURROUNDING AREA THAT TOGETHER HAVE A MINIMUM POPULATION OF 50,000. POPULATION NOT CLASSIFIED AS URBAN CONSTITUTES THE RURAL POPULATION. RURAL CLASSIFICATION NEED NOT IMPLY FARM RESIDENCE OR A SPARSELY SETTLED AREA BECAUSE A SMALL CITY IS RURAL AS LONG AS IT IS OUTSIDE AN URBANIZED AREA AND HAS FEWER THAN 2,500 PERSONS.

(D) DATA WITHHELD TO AVOID DISCLOSURE OF INFORMATION ABOUT INDIVIDUAL PERSONS.

1/ INCLUDES THE FOLLOWING CATEGORIES NOT LISTED SEPARATELY: ASIAN AND PACIFIC ISLANDER GROUPS NOT IDENTIFIED SEPARATELY; PERSONS REPORTING AS MEXICAN, CUBAN, SOUTH AMERICAN, CHICANO, OR LA RAZ; AND OTHER RACES NOT LISTED SPECIFICALLY ON THE QUESTIONNAIRE.

2/ IN 1980 PERSONS WHO DID NOT CLASSIFY THEMSELVES IN A SPECIFIC RACE CATEGORY BUT REPORTED THEMSELVES AS CUBAN, PUERTO RICAN, MEXICAN, OR DOMINICAN WERE INCLUDED IN "OTHER," A CATEGORY NOT LISTED SEPARATELY ON THIS TABLE. IN 1970 MOST OF THESE PERSONS WERE INCLUDED IN "WHITE."

3/ INCLUDES JAPANESE, CHINESE, FILIPINO, KOREAN, ASIAN INDIAN, VIETNAMESE, HAWAIIAN, GUAMANIAN, OR SAMOAN.

4/ INCLUDES THOSE WHO CLASSIFIED THEMSELVES AS MEXICAN, PUERTO RICAN, OR CUBAN AND THOSE WHO INDICATED THAT THEY WERE OF OTHER SPANISH/HISPANIC ORIGIN. PERSONS OF SPANISH ORIGIN MAY BE OF ANY RACE.

NOTE: COUNTS OF POPULATION BY RACE AND SPANISH ORIGIN ARE PROVISIONAL. FINAL COUNTS WILL BE DETERMINED AFTER SAMPLE DATA HAVE BEEN PROCESSED.

A/ FIGURES OBTAINED FROM THE 1970 CENSUS OF POPULATION. DETAIL MAY NOT ADD TO TOTALS BECAUSE OF ROUNDING.

NOTE: LAND AREA FIGURES REPRESENT THE TOTAL AREA IN THE COUNTIES IN 1970 AND ARE NOT ADJUSTED FOR LANDS WHICH CANNOT BE DEVELOPED (GOVERNMENT-OWNED PARKS OR RESERVES) OR ARE UNINHABITABLE (SWAMPS OR MARSHES). COUNTY AREAS HAVE BEEN REMEASURED AND THE CENSUS BUREAU WILL RELEASE 1980 FIGURES. SOME COUNTY AREAS MAY CHANGE SLIGHTLY BECAUSE OF PREVIOUS ERRORS IN MEASUREMENT.

NOTE: STATE PROJECTIONS ARE BASED ON THREE DIFFERENT SETS OF ASSUMPTIONS REGARDING ANNUAL NET MIGRATION. THE HIGH PROJECTIONS ARE SIMILAR TO THE LARGE MIGRATION LEVELS OF THE FIRST HALF OF THE 1970S WHEN MORE PEOPLE WERE MIGRATING TO FLORIDA THAN EVER BEFORE. THE LOW MIGRATION LEVELS ARE SIMILAR TO THOSE BETWEEN 1975 AND 1977 WHEN FLORIDA POPULATION GROWTH RATES WERE AMONG THE LOWEST SINCE WORLD WAR II. THE MEDIUM ASSUMPTIONS IMPLY ANNUAL NET MIGRATION LEVELS SIMILAR TO THE AVERAGE IN THE 1970S. COUNTY PROJECTIONS ARE BASED ON AN AVERAGE OF PROJECTIONS DERIVED FROM NINE DIFFERENT TECHNIQUES. FOR THE MEDIUM SERIES, THE SUM OF THE COUNTY PROJECTIONS EQUALS THE STATE PROJECTION FOR EACH YEAR (EXCEPT FOR SLIGHT DIFFERENCES DUE TO ROUNDING). FOR THE HIGH AND LOW SERIES, HOWEVER, THE SUMS OF THE COUNTY PROJECTIONS DO NOT EQUAL THE STATE PROJECTIONS. THE 1981 ESTIMATES HAVE BEEN USED AS THE BASE FROM WHICH TO GENERATE THESE PROJECTIONS. FOR A MORE DETAILED DISCUSSION OF METHODOLOGY, SEE THE SOURCE.

HOUSING

The decennial Census of Housing is taken simultaneously with the Census of Population and provides basic information about people in their living arrangements. This Abstract contains summary tables for counties and cities on year-round, occupied, and renter-occupied housing units and on such items as the value of housing units, persons in family and nonfamily households, persons in group quarters, condominiums, and rents. These data have been abstracted from Summary Tape File 1, Florida. See the introduction to Section 1.00 for a more detailed discussion of available data from the 1980 Census of Population and Housing.

A housing unit is defined by the Bureau of the Census as a house, apartment, mobile home or trailer, group of rooms, or a single room occupied or intended for occupancy as separate living quarters, that is, when the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall.

A household consists of the person or persons occupying a housing unit. Counts of households, householders, and occupied housing units are always identical.

A householder is the person who listed herself or himself in column one on the census questionnaire as the person or one of the persons in whose name the home is owned or rented. This designation was revised from 1970 to replace the "head of household" category. The 1980 householders differ from the 1970 household heads primarily where the wife in a married couple family is listed as the person in column one. In 1970, the husband was always designated the "head" of such a family.

All persons not living in households are classified as living in group quarters. These include institutions offering care or custody as well as dormitories, barracks, monasteries, missions, and large rooming or boarding houses or communes having at least nine persons unrelated to the resident who maintains the living quarters.

Two agencies of the State of Florida provide information related to housing. The Division of Motor Vehicles of the Department of Highway Safety and Motor Vehicles publishes annual totals of tags sold to owners of mobile homes and recreational vehicles. The Division of Hotels and Restaurants of the State Department of Business Regulation publishes statistics on apartment houses, rooming houses, and licensed lodgings.

The Florida Association of Realtors publishes a quarterly news release which provides figures on average sales prices of homes and condominiums in various Florida cities.

TABLE 2.06. HOUSEHOLDS OR OCCUPIED HOUSING UNITS: CENSUS COUNTS OF HOUSEHOLDS AND OCCUPIED HOUSING UNITS, APRIL 1, 1970 AND 1980, AND NUMBER AND PERCENTAGE RENTER-OCCUPIED, APRIL 1, 1980, IN THE STATE AND COUNTIES OF FLORIDA

1/ BECAUSE A HOUSEHOLD IS DEFINED AS THE NUMBER OF PERSONS OCCUPYING A HOUSING UNIT, THE COUNT OF PERSONS IN HOUSEHOLDS IS IDENTICAL TO THE COUNT OF PERSONS IN OCCUPIED HOUSING UNITS.

2/ A FAMILY IS TWO OR MORE PERSONS RELATED BY BIRTH, MARRIAGE, OR ADOPTION AND WHO LIVE TOGETHER AS ONE HOUSEHOLD. A FAMILY HOUSEHOLD MAY ALSO INCLUDE NONRELATIVES LIVING WITH THE FAMILY.

3/ A HOUSEHOLD CONSISTING OF A PERSON LIVING ALONE OR OF A HOUSEHOLDER LIVING WITH PERSONS NOT RELATED TO HIM OR HER.

4/ UNITS WITH COMPLETE PLUMBING FACILITIES (PIPED HOT/COLD WATER, FLUSH TOILET, AND BATHTUB OR SHOWER), BUT ALSO USED BY ANOTHER HOUSEHOLD.

5/ PERSONS IN LIVING ARRANGEMENTS SUCH AS ROOMING HOUSES, NURSING HOMES, MILITARY BARRACKS, COLLEGE DORMITORIES AND SORORITY AND FRATERNITY HOUSES, CONVENTS OR MONASTERIES, ETC. AND PERSONS WHO ARE INMATES OF INSTITUTIONS.

1/ UNIT MAY BE OWNED BY FRIENDS OR RELATIVES WHO LIVE ELSEWHERE AND ALLOW OCCUPANCY WITHOUT CHARGE OR MAY BE PROVIDED TO COMPENSATE CARETAKERS, MINISTERS, TENANT FARMERS, ETC.

2/ RENT REGARDLESS OF ANY FURNISHINGS, UTILITIES, OR SERVICES INCLUDED. MEDIAN RENT IS CALCULATED AS THE VALUE WHICH DIVIDES RENT AMOUNTS INTO TWO EQUAL PARTS, ONE-HALF BELOW THE MEDIAN AND ONE-HALF ABOVE.

NOTE: SPECIFIED RENTER-OCCUPIED UNITS EXCLUDE ONE-FAMILY HOUSES ON 10 ACRES OR MORE.

SOURCE: U.S., DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS, CENSUS OF POPULATION AND HOUSING, 1980: SUMMARY TAPE FILE 1A, FLORIDA.

VITAL STATISTICS AND HEALTH

The Public Health Statistics Section of the Florida Department of Health and Rehabilitative Services is the principal source of vital statistics and morbidity statistics for Florida and its counties. Data are released on a monthly basis and later accumulated in two annual reports, Florida Vital Statistics and Florida Morbidity Statistics. The publications include comprehensive data on births, infant deaths, abortions, illegitimate births, deaths by cause, on marriages, divorces, annulments, and on notifiable diseases. It is well known that many notifiable diseases are incompletely reported, but the degree of under-reporting is not known. For births and deaths, resident is the term which indicates all births or deaths among residents of a specified area regardless of where the event occurred, while recorded is the term used to identify all births or deaths occurring in the specified area regardless of the usual residence of the person counted.

The National Center for Health Statistics in the NCHS Monthly Vital Statistics Report provides national and occasionally state vital statistics data. The May 1982 issue provided information on births to parents of Hispanic origin for Florida and 19 other states.

The Division of Mental Health of the Florida Department of Health and Rehabilitative Services publishes each year the Statistical Report of Hospitals containing information on admissions, discharges, and types of illnesses.

Health, United States is an annual publication of the U.S. Public Health Service and contains national information on health status and determinants, utilization of health resources, and health care resources and expenditure. Regional and state data for some items are included.

Information on health services establishments, employment, and payroll are in Section 20.00.

EDUCATION

After housing and health, education becomes an important ingredient of a person's or a community's well-being. Data on the extent of public education, the level achieved by the pupils, and the availability and enrollments of schools, colleges, and universities are included in Section 4.00. Employment and finances of educational institutions and services and data on private schools will be found in Section 20.00, Health, Education, and Cultural Services. Additional information on the public funding of education will be found in Section 23.00.

The principal sources of the basic information on education in Florida include Profiles of Florida School Districts, the annual report of the State Commissioner of Education, the Management Information Services (MIS) of the Division of Public Schools, and other publications of the Department of Education. In Department of Education publications, enrollment refers to the cumulative number of pupils registered during a school year; membership is the number registered at one point in time.

Enrollment information about the State University System is made available by the Office of the President, Budget and Analysis of the University of Florida and in the Fact Book published by the Board of Regents. Data on public community colleges have come from reports of the Division of Community Colleges of the Department of Education. Private college information is collected by and published in the annual report of the State Board of Independent Colleges and Universities.

Public and private colleges and universities in Florida are also included in the Education Directory published by the National Center for Education Statistics.

NOTE: DATA WERE OBTAINED FROM THE 1981 FALL STUDENT SURVEY, ESE 269. BECAUSE SOME HIGH SCHOOLS DO NOT HAVE A FORMAL FOLLOW-UP PROGRAM FOR GRADUATES, IT WAS NECESSARY FOR THE PRINCIPAL OR GUIDANCE COUNSELOR TO PREPARE ESTIMATES FOR SOME OF THE ITEMS INCLUDED. FIGURES INCLUDE TWELFTH GRADE GRADUATES FROM ADULT CENTERS AND EXCEPTIONAL AND GIFTED SCHOOLS.

INCOME AND WEALTH

The source for statistics on personal income in Florida is the U.S. Department of Commerce, Bureau of Economic Analysis (BEA). The BEA has made comprehensive estimates of personal income, by type and industrial source, covering all economic areas and standard metropolitan statistical areas (SMSAs) and counties in the nation for selected years from 1929 through 1980. Estimates for 1975-80 are published in a ten-volume series, Local Area Personal Income.

Personal income is defined as the current income of persons in an area from all sources. It is measured before deduction of income and other personal taxes, but after deduction of personal contributions to social insurance programs and is reported in current dollars (no adjustment is made for price changes). It consists of wages and salaries (in cash and kind); various types of supplementary earnings, termed other labor income; the net incomes of owners of unincorporated businesses (farm and nonfarm with the latter including the income of independent professionals), termed proprietors income; net rental income, dividends, and interest, termed property income; and government and business transfer payments (consisting in general of disbursements to persons for which no services are rendered currently), termed transfer payments.

The labor and proprietary components of personal income are allocated on a place-of-work basis. These earnings are converted to a place-of-residence basis by means of a residence adjustment factor. Property income and transfer payments are then added to earnings, resulting in total income on a place-of-residence basis. This conversion is illustrated on Table 5.13. The first basis, earnings by place of work, is useful in the analysis of the income structure of a given area in terms of industrial markets and purchasing power. Expressed on a per capita basis, the latter is an indicator of living standards and welfare level. The population estimates on which the per capita amounts are based are those of the U.S. Bureau of the Census and are not the estimates shown in the population section of this publication. See Section 9.00 for estimates of farm income.

Money income, usually presented as family or household income, is a series produced by the U.S. Census Bureau using the decennial censuses as benchmarks. National money income estimates appear on Table 5.47. United States and Florida family and household income numbers from the 1980 Census of Population appear on Tables 1A.01 and 1A.02. County income numbers for 1980 will be available in Fall 1982, too late for inclusion in this Abstract.

Updated estimates of national poverty thresholds are published based on data from the U.S. Census Current Population Reports, Series P-60. The U.S. Bureau of Labor Statistics (BLS) develops the income levels for defining poverty for the Comprehensive Employment and Training Act (CETA) program. The BLS also provides data on family budgets for retired persons and for a family of four.

One record of income is the annual reports of the U.S. Internal Revenue Service. Data this year show sources, deductions, tax credits, and distribution of income by income class. These come from Statistics of Income: Individual Income Tax Returns. Three other series of the Statistics of Income series provide additional measures of income and wealth: Partnership, Sole Proprietorships, and Private Foundations.

1/ INCLUDES SHELTER, HOUSEFURNISHINGS, AND HOUSEHOLD OPERATIONS. HIGHER BUDGET ALSO INCLUDES AN ALLOWANCE FOR LODGING AWAY FROM HOME CITY.

2/ INCLUDES AVERAGE COSTS FOR READING, RECREATION, TOBACCO PRODUCTS, ALCOHOLIC BEVERAGES, EDUCATION, AND MISCELLANEOUS EXPENDITURES.

3/ INCLUDES ALLOWANCES FOR GIFTS AND CONTRIBUTIONS, LIFE INSURANCE, AND OCCUPATIONAL EXPENSES.

4/ PLACES IN THE UNITED STATES WITH A POPULATION OF 2,500 TO 50,000.

5/ PLACES IN THE SOUTH WITH A POPULATION OF 2,500 TO 50,000.

NOTE: THE FAMILY CONSISTS OF AN EMPLOYED HUSBAND, AGE 38, A WIFE NOT EMPLOYED OUTSIDE THE HOME, AN 8-YEAR-OLD GIRL, AND A 13-YEAR-OLD BOY. The 1981 CONSUMPTION BUDGETS WERE ESTIMATED BY APPLYING PRICE CHANGES FOR INDIVIDUAL AREAS FROM AUTUMN 1980 TO AUTUMN 1981, AS REPORTED IN THE CONSUMER PRICE INDEX FOR URBAN WAGE EARNERS AND CLERICAL WORKERS TO THE APPROPRIATE AUTUMN 1980 BUDGET COSTS FOR EACH MAIN CLASS OF GOODS AND SERVICES.

SOURCE: U.S., DEPARTMENT OF LABOR, BUREAU OF LABOR STATISTICS, AUTUMN 1981 URBAN FAMILY BUDGETS AND COMPARATIVE INDEXES FOR SELECTED URBAN AREAS, RELEASE OF APRIL 16, 1982.

6.00

LABOR FORCE, EMPLOYMENT, AND EARNINGS

Economic welfare for most individuals and families depends upon employment. The basis of statistics on the employment status of the population is a monthly Current Population Survey conducted by the U.S. Bureau of the Census. Employed persons are defined in the Handbook of Labor Statistics as comprising "all those who, during the survey week, worked at all as paid employees, in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers in an enterprise operated by a family member" and all those temporarily absent from their jobs due to such factors as illness or vacation.

Unemployed persons are defined as those "who did not work during the survey week, who made specific efforts to find a job within the previous four weeks and who were available to work during the survey week except for temporary illness."

The civilian labor force is made up of all civilians classified as employed or unemployed. The unemployment rate is the number of unemployed expressed as a percentage of the civilian labor force. Persons 16 years of age and older not classified as employed or unemployed are counted as not in the labor force.

The Bureau of Research and Analysis, Division of Employment Security, Department of Labor and Employment Security of the State of Florida has the responsibility of preparing these estimates following procedures developed in cooperation with the U.S. Bureau of Labor Statistics. It publishes information about Florida in Florida Employment Statistics and about standard metropolitan statistical areas in Labor Market Trends; special releases are issued on small counties. Different samples are used to prepare these sets of employment and unemployment estimates. A quarterly report on the characteristics of the insured unemployed is also released. A special report prepared for the Florida Occupational Information System, is available giving Florida Occupational Demand, 1980-1990.

The Annual Report of the Florida Commission on Human Relations gives information about complaints of employment discrimination.

The U.S. Bureau of Labor Statistics compiles statistics and publishes data on nonagricultural employment in Florida and its standard metropolitan statistical areas (SMSAs). Its publications include Employment and Earnings: States and Areas, Geographic Profile of Employment and Unemployment, monthly and annual surveys of Work Stoppages, Directory of National Unions and Employee Associations, and the Handbook of Labor Statistics. It also publishes a series of bulletins under the title News, each of which contains data on a topic of interest related to employment, such as union membership and average annual pay.

The decennial Census of Population provides much employment information. Some data for Florida and the U.S. are included on Tables 1A.01 and 1A.02. County employment from the 1980 Census will probably be available in Fall 1982, too late for inclusion in this Abstract.

Data on federal employees in Florida come from the annual report of the Office of Personnel Management of the U.S. Civil Service Commission. The Employment and

Training Report of the President is the source of information on enrollments under the Comprehensive Employment and Training Act and also contains much other employment data.

Statistics on seasonal agricultural employment are available from the Florida Department of Labor and Employment Security, Bureau of Research and Analysis. The U.S. Bureau of Economic Analysis provides data on farm proprietors and wage and salaries workers.

Tables of covered employment and payroll are presented in sections of this Abstract devoted to individual industries and nonprofit organizations. Any firm or nonprofit establishment whose employees are covered by state and federal unemployment laws must submit monthly reports (ES-202) on the number of persons on its payroll and the amount they were paid so that the appropriate tax can be computed and collected. The data this generates provide useful measurements of the impact of various kinds of industries, firms, or other organizations on the economies of the state and counties. The Bureau of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security compiles these statistics. In these reports the number of reporting units is the average for the quarter, employment is for the week of the 12th in the specified month, and payroll is for the entire quarter.

Covered employment data include approximately 95 percent of employed persons in Florida, but certain workers are specifically excluded from coverage. These are principally railroad and some agricultural, local government, and domestic employees and self-employed workers. Also excluded are most nonprofit organizations with fewer than four employees. Included among the self-employed are such types of persons as insurance or real estate agents and barbers whose remuneration is solely by way of commissions. Beginning with January 1, 1978, coverage of the Florida Unemployment Compensation Law was extended to include (1) employees of agricultural establishments in SIC industries 01, 02, and 07 that meet minimum employment and payroll standards, (2) employees of nonprofit schools, SIC industry code 821, (3) domestic workers for employees reporting payrolls of at least $1,000 a quarter, SIC code 881, and (4) public service employees whose positions are funded through contract with CETA (Comprehensive Employment and Training Act) prime sponsors. These would be mostly in SIC codes 80, 82, 83, 86, and 91.

Also missing from the tables are categories for the state or counties in which there were no firms or so few units that the information for an individual establishment might be made public or estimated by competitors. Where one firm in a specific category has 80 percent of the employment of all the business in that category ranges have been substituted for total amounts to avoid disclosure but give some idea of the magnitudes involved.

The derivation and meaning of SIC codes are discussed in the preface of this Abstract. Table 6.13 presents data for all covered employees by industry and Table 6.14 by county. Tables in various sections present state data by industry, such as Tables 12.50, 13.36, 14.35, etc. Printouts of county employment and payroll data by industry for March of each year from 1976 through 1981 are available from the Bureau of Economic and Business Research, University of Florida. (Write for cost and ordering information.)

Detailed employment data for governments can be found in Section 23.00.

Another source of data on employment by county and industry, County Business Patterns, is published each year by the U.S. Bureau of the Census. It provides information on employment by SIC code in the state and counties of Florida.

SOCIAL INSURANCE AND WELFARE

In this section are data related to government programs for old-age, survivors, disability, and health insurance; and public assistance.

Old-age, survivors, disability, and health insurance--popularly referred to as social security--provides monthly cash benefits to retired or disabled insured workers and their dependents and to the survivors of an insured worker. The source of statistics on these programs is the U.S. Department of Health and Human Services, Social Security Administration in the Social Security Bulletin, published monthly with an annual statistical supplement and in the release of unpublished data.

The U.S. Department of Health and Human Services, Social Security Administration publishes data on state programs. Workmen's compensation provides protection against work-connected injuries and deaths. Data on this program are published periodically in the Social Security Bulletin.

The Health Care Financing Administration in the U.S. Department of Health and Human Services publishes data on medicare and medicaid programs in the Medicare and Medicaid Data Book and Medicare: Health Insurance for the Aged and Disabled.

Four public assistance programs--for the aged, the blind, the permanently and totally disabled, and dependent children--are administered by the state but are financed in part by the federal government in grants to states under the Social Security Act. The principal source of state and national data on these programs is the U.S. Department of Health and Human Services. The principal source of data on Florida and Florida's counties is the Florida Department of Health and Rehabilitative Services, Annual Statistical Report. Information about state assistance is also reported in the Annual Report of the Comptroller.

The Division of Unemployment Insurance of the Florida Department of Labor and Employment Security has published a report entitled Historical Series of Unemployment Insurance, 1937-79 and can supplement it with unpublished data.

A/ REVISED.

B/ PRELIMINARY.

1/ NET CASH AND MEDICAL BENEFITS PAID DURING THE CALENDAR YEAR BY PRIVATE INSURANCE CARRIERS UNDER STANDARD WORKMEN'S COMPENSATION POLICIES.

2/ NET CASH AND MEDICAL BENEFITS PAID BY STATE FUNDS COMPILED FROM STATE REPORTS (PUBLISHED AND UNPUBLISHED); ESTIMATED FOR SOME STATES.

3/ CASH AND MEDICAL BENEFITS PAID BY SELF-INSURERS, PLUS THE VALUE OF MEDICAL BENEFITS PAID BY EMPLOYERS CARRYING WORKMEN'S COMPENSATION POLICIES THAT DO NOT INCLUDE THE STANDARD MEDICAL COVERAGE. ESTIMATED FROM AVAILABLE STATE DATA.

SOURCE FOR TABLES 7.58 AND 7.59: U.S., DEPARTMENT OF HEALTH AND HUMAN SERVICES, SOCIAL SECURITY ADMINISTRATION, SOCIAL SECURITY BULLETIN, FEBRUARY 1982, AND PREVIOUS EDITIONS. 1979 AND 1980 DATA ON TABLE 7.59 FROM PREPUBLICATION RELEASE.

8.00

GEOGRAPHY AND CLIMATE

Florida, the people, is contained in Florida, the land, with its variety of elevations, water surfaces, vegetation, and animal life. Basic, too, to the quality of life and the economy of the state are such aspects of climate as temperature, length of season, and rainfall. These are the environmental factors described in Section 8.00.

Political subdivisions are described in the introduction to Section 1.00, Population. In this section the natural phenomena are, to the extent possible, related to cities and/or counties.

Tables in the section which contain information relating to temperature, precipitation, and other climatological phenomena are based on data supplied by the Environmental Data and Information Service of the National Oceanic and Atmospheric Administration, U.S. Department of Commerce. Their publications are issued both annually and monthly under the title, Climatological Data, Florida.

The 1980 Census of Population report Number of Inhabitants, Florida (PC80-1-A11) provides updated information on the area of the state and counties of Florida.

The American Gas Association includes figures on heating and cooling degree days by the state in the annual editions of Gas Facts.

Information pertaining to the ownership of land in Florida by the federal government comes from the Bureau of Land Management of the U.S. Department of the Interior and the U.S. General Services Administration.

A/ TRANSFERENCE OF MANY WEATHER STATIONS BETWEEN CITY LOCATIONS AND NEARBY AIRPORTS HAS LED TO THE INTRODUCTION OF SLIGHT INCONSISTENCIES IN THE AVERAGE DATA.

1/ HEATING SEASON IS DEFINED AS NOVEMBER THROUGH MARCH PERIOD.

NOTE: HEATING DEGREE DAYS MEASURE THE COLDNESS OF THE WEATHER BASED ON THE EXTENT TO WHICH THE DAILY MEAN TEMPERATURE FALLS BELOW 65 DEGREES FAHRENHEIT. ON A DAY WHEN THE MEAN OUTDOOR DRY-BULB TEMPERATURE IS 35 DEGREES FAHRENHEIT, THERE WOULD BE 30 DEGREE DAYS COUNTED. DAILY MEAN TEMPERATURE IS THE SUM OF THE HIGH AND LOW READINGS DIVIDED BY TWO.

AGRICULTURE

Agriculture, of all the industries, comes first not only because it is the oldest but because it is the most dependent on nature. It makes not only a direct contribution to the income and employment of Floridians but also an indirect contribution through support industries and manufacturing. Data on farm income is presented in Section 5.00 with income data from other sources.

A Census of Agriculture has been taken every five years through 1974. In order to put this census on the same basis as the other economic censuses, the count planned for 1979 was moved forward to 1978. 1978 Census data dealing with the characteristics of farms and farm operators are presented in this section. An index at the back of this book lists census tables appearing in previous Abstracts. A farm is now defined as "any place from which $1,000 or more of agricultural products were sold or normally would have been sold during the census year." The category "farms with sales of $2,500 or more" includes only farms with actual sales of $2,500 or more. For 1969 and 1974, farms reporting sales of less than $2,500 but having the production potential for sales over $2,500 are included in most tables under the category farms with sales of $2,500 or more. An index of census tables appearing in previous Abstracts is at the back of this edition.

Timely and detailed data on farm receipts, income, production, and value of farm marketings are provided in tables based on annual publications of the U.S. Department of Agriculture, Agricultural Outlook, Agricultural Statistics, Economic Indicators of the Farm Sector: State Income and Balance Sheet Statistics, and other publications. Two additional sources are the Crop and Livestock Reporting Service, Orlando, and the Agricultural Experiment Station of the University of Florida, Gainesville.

When comparisons are made between Florida and other states, the other states selected either have a similar climate (the southern tier of sunbelt states) or produce similar crops (citrus in Arizona and California, sugarcane in Hawaii and Louisiana, eggs in Alabama and Mississippi, etc.).

Expanded coverage of the Florida Unemployment Compensation Law beginning in 1978 has permitted the Florida Department of Labor and Employment Security to supply more comprehensive data on establishments, employees, and payrolls of agricultural establishments, SIC codes 01, 02, and 07.

Information about citrus production and other crop cultivation is from the Florida Crop and Livestock Reporting Service. Also there are data on the consumption of fertilizers from the Florida Department of Agriculture and Consumer Services.

The U.S. Department of Agriculture, Agriculture and Stabilization Service provides information on government payments and also makes estimates of the number of farms. This agency also collects reports on nonresident alien ownership of agricultural land and has provided state and county estimates for a report published by the Florida Legislature.

The U.S. Department of Agriculture, Economics, Statistics, and Cooperatives Service has issued a report which gives state information: Foreign Ownership of U.S. Agricultural Land.

FORESTRY, FISHERIES, AND MINERALS

In addition to agriculture, other basic industries in which people work closely with nature to develop resources and production are forestry (SIC code 08), fisheries (SIC code 09), and mining (SIC codes 10-14).

The American Forest Institute provides data on tree farms. Employment and payroll data come from the Florida Department of Labor and Employment Security, as does similar information for fisheries and mining. See the introduction to Section 6.00. Acreage devoted to commercial forests by county is estimated by the Forest Service of the U.S. Department of Agriculture. The Division of Forestry of the Florida Department of Agriculture and Consumer Services has estimated county income from forest products and, in Florida Forests, has published data on types of forest by region and county.

The National Marine Fisheries Service of the U.S. Department of Commerce provides data on fish landings and fishery products, plants, and cooperatives. Data on fish kills are provided by the U.S. Environmental Protection Agency. The Food and Resource Economics Department of the Institute of Food and Agricultural Sciences, University of Florida has issued a staff paper on Economic Impact Estimates for Florida's Commercial Fisheries, 1978. Table 19.45 in Section 19.00 gives information on the number of commercial and pleasure boats registered.

Basic data on the production of minerals are from preprints of the Minerals Yearbook and specific industry reports of the Bureau of Mines of the U.S. Department of Interior. Every five years the U.S. Bureau of the Census conducts a Census of Mineral Industries. An index at the back of this book lists census tables appearing in previous Abstracts.

Land Areas of the National Forest System comes from the U.S. Department of Agriculture, Forest Service.

CONSTRUCTION

In this section are statistics on building construction activity and characteristics of the industry (SIC codes 15-17). The principal source of construction data for Florida is the Bureau of Economic and Business Research (BEBR), University of Florida, in its several publications. The BEBR publishes monthly, quarterly, and annual summaries on the type and value of building permits for construction issued by administrative offices in each of approximately 430 places in Florida, in Building Permit Activity in Florida. The BEBR prepares projections of housing starts for Florida and its major metropolitan areas and makes them available exclusively to subscribers of The Florida Outlook.

Additional sources of data on construction in the various states are reports available from F.W. Dodge Company, a division of McGraw-Hill, Inc.; the Construction Review, published monthly by the Bureau of Industrial Economics of the U.S. Department of Commerce; and Construction Reports: Value of New Construction Put in Place (and other topics), published by the U.S. Bureau of the Census.

Every five years the U.S. Bureau of the Census conducts a Census of Construction Industries, which includes such items as receipts, employment, payroll, and value added. An index of Census tables appearing in previous Abstracts is at the back of this edition.

Data on employment and payrolls are supplied by the Florida Department of Labor and Employment Security as described in the introduction to Section 6.00.

[1] INCLUDES A NONRESIDENTIAL VALUE OF $657,185,142, WHICH WAS ROUNDED TO $657,200 IN THOUSANDS, CAUSING AN OVERSTATEMENT OF $14,858. THIS OVERSTATEMENT IS REFLECTED IN THE COUNTY AND THE STATE TOTALS FOR BOTH NONRESIDENTIAL AND TOTAL VALUE. THE PERMIT WAS ISSUED FOR A PROJECT AT WALT DISNEY WORLD.

NOTE: DATA INCLUDE ACTIVITY REPORTED BY APRIL 1982. FIGURES ARE AGGREGATES OF VALUE ON MONTHLY REPORTS RECEIVED FROM PERMIT-ISSUING PLACES. SEE TABLE 11.15 FOR A RECORD OF THE NUMBER OF REPORTS RECEIVED AND FOR CHANGES IN PERMIT-ISSUING STATUS. A VALUE OF (0) THOUSAND DOLLARS INDICATES THE VALUE WAS BETWEEN 0 AND 500 DOLLARS.

1/ STATES WITH 1981 SHIPMENTS OF 2,000 OR MORE ARE LISTED.

NOTE: A MOBILE HOME IS DEFINED AS A MOVEABLE DWELLING, TEN FEET OR MORE WIDE AND THIRTY-FIVE FEET OR MORE LONG, DESIGNED TO BE TOWED ON ITS OWN CHASSIS, WITH TRANSPORTATION GEAR INTEGRAL TO THE UNIT WHEN IT LEAVES THE FACTORY, AND WITHOUT NEED OF A PERMANENT FOUNDATION. THESE MOBILE HOMES INCLUDE DOUBLE-WIDES AND EXPANDABLE MOBILE HOMES. EXCLUDED ARE TRAVEL TRAILERS, MOTOR HOMES, AND MODULAR HOUSING. THE SHIPMENTS' FIGURES ARE BASED ON REPORTS SUBMITTED BY MANUFACTURERS ON THE NUMBER OF MOBILE HOMES ACTUALLY SHIPPED DURING THE SURVEY MONTH. SHIPMENTS TO DEALERS MAY NOT BE PLACED FOR RESIDENTIAL USES IN THE SAME MONTH AS THEY ARE SHIPPED. THE NUMBER OF MOBILE "HOMES" USED FOR NONRESIDENTIAL PURPOSES IS NOT KNOWN. THESE SHIPMENTS STATISTICS ARE PRODUCED BY THE NATIONAL CONFERENCE OF STATES ON BUILDING CODES AND STANDARDS.

MANUFACTURING

The natural products of the farms, forests, fisheries, and mines are transformed into new products by the manufacturing industry. A manufacturing establishment, as defined by the U.S. Bureau of the Census, usually consists of a single physical location at which this transformation is performed. Traditionally economists have referred to manufacturing as the creation of form utility. Major industry divisions comprise SIC codes 20-39.

Data on the number of units, number of employees, and payroll were obtained from the Bureau of Research and Analysis, Division of Employment Security of the Florida Department of Labor and Employment Security. A number of additional industries are detailed, including county breakdowns.

The U.S. Bureau of the Census conducts a complete count of manufactures every five years and a sample survey in intervening years. Data from the 1977 Census are included in this edition of the Abstract. An index of Census tables appearing in previous Abstracts is at the back of this edition. The sample survey is called the Annual Survey of Manufactures, and information from the 1978 survey is in this issue of the Abstract. The annual survey program also provides information on employment related to the export of manufactured goods.

Another source of such information is the Annual Survey of Industrial Purchasing Power, published by Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

A publication of the Division of Economic Development of the Florida Department of Commerce called Florida Facts is the source of a list of the larger manufacturers in the state.

TRANSPORTATION

The U.S. Department of Transportation provides data on roads and highways, tax receipts, and vehicles in Highway Statistics a publication of the Federal Highway Administration. The same agency publishes annually a report entitled Fatal and Injury Accident Rates on FederalAid and Other Highway Systems. Information about licenses and drivers of motor vehicles comes from the Florida Department of Highway Safety and Motor Vehicles. The same source publishes Traffic Accident Facts.

Every five years the Bureau of the Census conducts a Census of Transportation. Survey data on characteristics and use of trucks is published under the title Truck Inventory and Use Survey. An index at the back of the book lists tables appearing in previous editions of Abstract.

The principal sources of information about railroads (SIC code 40) are the Public Service Commission of the State of Florida, the Yearbook of American Railroad published by the Association of American Railroads, and the Florida Department of Revenue, which supplies data on the value of rights-of-way.

Employment and payroll figures for all modes of transportation except railroads are supplied by the Florida Department of Labor and Employment Security. Railroads are not included because their employees are not covered by the same unemployment law as workers in other industries.

Water transportation (SIC code 44) includes both the movement of vessels through Florida waterways and the volume of commodities shipped into and out of Florida ports. The authorities of the various ports in the state have supplied data on their activities. The volume of waterborne exports and imports is supplied by the Bureau of the Census in an annual report. The Economic Report of the Governor also reports data on imports and exports through Florida ports.

Air transportation (SIC code 45) is represented by data showing exports and imports obtained from U.S. Airborne Exports and General Imports, published by the Bureau of the Census of the U.S. Department of Commerce. Air traffic information comes from two sources developed by the Federal Aviation Administration of the U.S. Department of Transportation: FAA Air Traffic Activity and Airport Activity Statistics of Certified Route Air Carriers.

TABLE 13.16. ROADS AND STREETS: EXISTING TOTAL MILEAGE OF ROADS AND STREETS BY JURISDICTION IN FLORIDA, DECEMBER 31, 1979 AND 1980

JURISDICTION	1979	1980
TOTAL	A/ 96,281	97,153
RURAL MILEAGE		
UNDER STATE CONTROL	9,470	9,104
STATE PRIMARY SYSTEM	9,470	9,104
UNDER LOCAL CONTROL	56,739	54,548
COUNTY ROADS	56,739	54,548
UNDER FEDERAL CONTROL 1/	1,184	1,138
NONPUBLIC ROADS 2/	(NA)	3,571
URBAN MILEAGE		
UNDER STATE CONTROL	2,199	2,192
EXTENSIONS OF STATE PRIMARY SYSTEM	2,199	2,192
UNDER LOCAL CONTROL	26,689	26,600
LOCAL ROADS 3/	26,689	26,600

(NA) NOT AVAILABLE.

A/ DOES NOT INCLUDE NONPUBLIC ROADS.

1/ MILEAGE IN FEDERAL PARKS, FORESTS, AND RESERVATIONS THAT ARE NOT A PART OF THE STATE AND LOCAL HIGHWAY SYSTEMS.

2/ INCLUDES ROADS NOT DEFINED AS PUBLIC ROAD BY 23 USC 402(C), THAT IS, ANY ROAD NOT UNDER THE JURISDICTION OF AND NOT MAINTAINED BY A PUBLIC AUTHORITY AND NOT OPEN TO PUBLIC TRAVEL.

3/ INCLUDES MILEAGE NOT IDENTIFIED BY ADMINISTRATIVE AUTHORITY.

NOTE: INCOMPLETE DATA WERE SUBMITTED BY STATE AUTHORITIES; AREAWIDE DATA USED FOR TOTALS AND AVAILABLE DATA FROM PREVIOUS SUBMITTALS INCLUDED AND FACTORED TO 1980 LEVEL.

COMMUNICATIONS

Newspaper publishing and other print media (SIC code 27) are considered to be manufacturing by the U.S. Bureau of the Census as well as the Office of Management and Budget, which establishes the Standard Industrial Classification. But since newspapers, periodicals, and books compete with electronic media in providing communications, data are repeated in this section. Table 12.50 in Section 12.00 shows newspapers as a component of the manufacturing industry.

Also included in Section 14.00 are data on the U.S. Postal Service (SIC code 43), supplied by its southern regional headquarters in Memphis, telephones (SIC code 481), telegraph (SIC code 482), and radio and television broadcasting (SIC code 483). The Florida Public Service Commission supplies data on telephone companies in Florida. Employment and payroll data are from the Florida Department of Labor and Employment Security, Division of Employment Security, Bureau of Research and Analysis. In two tables dealing with employment and payroll, ranges have been substituted for total amounts in order to avoid disclosure of information about individual establishments.

Two copyrighted sources have been used with permission: Editor and Publisher International Yearbook for newspaper circulation, and Broadcasting magazine for radio and television broadcast revenues.

POWER AND ENERGY

Energy is an industry (SIC code 49) and also a national concern. Data in this section have been selected to describe the status of the electric, gas, and sanitary service industries, and the consumption of electricity, gas, gasoline, and fuel oil.

A major source of data on both aspects of the energy situation in Florida is Statistics of the Florida Electric Utility Industry, published by the Florida Public Service Commission. The Governor's Energy Office issues Monthly Florida Gasoline Consumption, Forecast of Energy Consumption in Florida, and Patterns of Enegy Consumption in Florida. The Division of Employment Security of the State Department of Labor and Employment Security supplies information on employment and payroll in the utility industry.

The Public Service Commission of Florida also supplies data on typical gas bills, generating capacity, and average consumption of electricity. Typical electric bill information comes from the U.S. Federal Power Commission.

Consumption of motor fuel data are obtained from the publication Highway Statistics of the Federal Highway Administration, the Florida Department of Revenue, and the Annual Report of the Comptroller, State of Florida.

Several tables provide data on the gas industry in Florida. These come from Gas Facts published by the American Gas Association. The U.S. Department of Energy, Energy Information Administration in the publications State Energy Data Report, 1960-78, Typical Electric Bills, and Cost and Quality of Fuels for Electric Utility Plants makes available data on energy consumption over time.

Additional information on the reserves and production of natural gas and petroleum are to be found in Section 10.00.

TABLE 15.02. ENERGY CONSUMPTION: AMOUNT CONSUMED BY SECTOR IN FLORIDA, SPECIFIED YEARS 1976 THROUGH 1990

(ROUNDED TO TRILLIONS OF BRITISH THERMAL UNITS)

WHOLESALE AND RETAIL TRADE

Basic classifications in these fields as determined by the U.S. Bureau of the Census place business establishments into three groups: (1) wholesale trade--establishments primarily engaged in selling merchandise to retailers, to institutions, to industrial, commercial, and professional users, or to other wholesalers; (2) retail trade--businesses primarily engaged in selling merchandise for personal, household, or farm consumption; and (3) service industries--establishments primarily engaged in rendering a wide variety of services to individuals and business establishments. Data referring to wholesale and retail trade (SIC 50-59) are located in Section 16.00. Data on services will be found in Sections 18.00, 19.00, and 20.00.

Only limited data from the 1977 Census of Wholesale and Retail Trade are contained herein. Detailed tables of information from the 1977 Census of Wholesale and Retail Trade and which are considered to be of a benchmark nature were included in the 1980 Florida Statistical Abstract. An index of Census tables appearing in previous Abstracts is at the back of this edition. Number of establishments, employment, payroll, and sales are analyzed both by kind of business and by geographical areas such as counties, municipalities, and standard metropolitan statistical areas therein.

Covered employment and payroll information by kind of business and county for March 1981, are included herein. These come from the Bureau of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security; see the introduction to Section 6.00. Since there are some differences in coverage and classification, these figures are not necessarily comparable with those from the economic censuses.

The Florida Department of Revenue is the source for information on sales reported by firms in connection with the sales and use tax laws. In addition to the tables presented in this section, printouts of county gross and taxable sales by business category are available from the Bureau of Economic and Business Research on a subscription basis. These also vary in coverage and classification from either the census or the Florida Department of Commerce figures. Data on retail sales tax collections may be found in Table 23.43. A time series of gross and taxable sales is to be found in Table 24.30.

The U.S. Bureau of the Census has stopped publishing the monthly data on department store sales, which was included in previous Abstracts.

Professional persons who operate at the retail level and are required to have a license such as dispensing opticians or pharmacists are kept track of and reported by the Florida Department of Professional Regulation.

TABLE 16.01. WHOLESALE TRADE: ESTABLISHMENTS, SALES, AND SALES PER ESTABLISHMENT IN FLORIDA, CENSUS YEARS 1948 THROUGH 1977

FINANCE, INSURANCE, AND REAL ESTATE

Industries covered in this section are those SIC codes numbered 60 through 67, including banking and other credit agencies, establishments dealing in securities and commodities, insurance and real estate offices, and holdings and investment firms.

Banks in Florida are organized under both Florida law and federal law. State-chartered banks are supervised by the Comptroller of the State of Florida and national banks, organized under federal law, are supervised by the Comptroller of the Currency of the United States.

Summaries of banking data for Florida may be found in the Annual Report of the Florida Division of Banking. Another major source of banking data is the Annual Report of the Federal Deposit Insurance Corporation. The figures on number of units, employment, and payroll come from the Florida Department of Labor and Employment Security, Division of Employment Security. See the introduction to Section 6.00.

Sources of information on savings and loan associations include the Annual Report and monthly Trends published by the Florida Savings and Loan League and the FSLICInsured Savings and Loan Associations Summary of Savings Accounts by Geographic Area and Savings and Home Financing Source Book both issued by the Federal Home Loan Bank Board. The Federal Home Loan Bank Board has also provided unpublished mortgage activity for loans made for single-family houses by savings and loan associations, mortgage bankers, commercial banks, and mutual savings banks.

The Florida Credit Union League publishes the Credit Union Statistical Yearbook which is the source of data on credit unions. The Florida Office of the Comptroller issues an Annual Report: Florida Chartered Credit Unions.

A basic source of information on activities on insurance companies in Florida is the Annual Report of the Florida Department of Insurance, Office of State Treasurer and Insurance Commissioner. A source of information on the United States and for individual states is the Life Insurance Fact Book, published annually by the American Council of Life Insurance. Another source is Insurance Facts, published by the Insurance Information Institute. Data on health insurance are from the Health Insurance Institute, Source Book of Health Insurance Data.

PERSONAL AND BUSINESS SERVICES

Services differ from trade in that no tangible product changes hands. (One hotel chain used to advertise, "We sell sleep.") Services are performed by business and nonprofit establishments for individuals, business firms, government agencies, and nonprofit organizations.

The Standard Industrial Classification System lists services from SIC code 70 to SIC code 89. In this section tables based on the establishments covered by the unemployment insurance law cover personal services (SIC code 72), business services (SIC code 73), auto repair services and garages (SIC code 75), miscellaneous repair services (SIC code 76), and services not elsewhere classified (SIC code 89). Information about establishments with other service SIC codes are to be found in Sections 19.00, 20.00, and 23.00.

Results of the 1977 Census of Service Industries are summarized in Section 18.00. These cover establishments classified from SIC code 70 to SIC code 79, SIC code 8072, SIC code 81 and SIC code 891. More detailed information from this Census was published in the 1980 Florida Statistical Abstract. Because the total number of establishments and total amounts of employment, payroll, and receipts are widely employed for market analysis and because these same totals for 1977 can be compared with totals by kind of business and by geographical area for 1972 and prior census years, they are all included in this section even though some of the kinds of business logically go elsewhere. An index of Census tables appearing in previous Abstracts is at the back of this edition.

Readers are cautioned that when comparisons are made between data for 1977 and those for previous census years it should be noted that changes in boundaries of SMSAs and municipalities and in kind of business classification have taken place.

Data on establishments, employment, and payroll of service establishments whose employees are covered by the unemployment insurance law are provided by the Division of Employment Security of the Florida Department of Labor and Employment Security; see the introduction to Section 6.00. Data for the same area and industry from the Census of Service Industries are not necessarily comparable because of differences in procedures, definitions, and establishments covered.

Many service establishments are operated by professional individuals who are licensed by the state. Data on the holders of such licenses have been supplied by the Florida Department of Professional Regulation.

TABLE 18.01. SELECTED SERVICE INDUSTRIES: ESTABLISHMENTS, RECEIPTS, AND RECEIPTS PER ESTABLISHMENT IN FLORIDA, CENSUS YEARS 1948 THROUGH 1977

CENSUS YEAR	ESTABLISHMENTS NUMBER	ESTABLISHMENTS PERCENTAGE CHANGE	RECEIPTS AMOUNT ($1,000)	RECEIPTS PERCENTAGE CHANGE	RECEIPTS PER ESTABLISHMENT AMOUNT (DOLLARS)	RECEIPTS PER ESTABLISHMENT PERCENTAGE CHANGE
1948	14,689	(NA)	330,334	(NA)	22,489	(NA)
1954	23,284	58.5	656,281	98.7	28,186	25.3
1958	2,561	39.8	1,026,814	56.5	31,535	11.9
1963	39,491	21.3	1,492,073	45.3	37,783	19.8
1967	46,358	17.4	2,275,243	52.5	49,080	29.9
1972	69,394	49.7	5,156,193	126.6	74,303	51.4
1977	81,761	17.8	8,549,374	65.8	104,565	40.7

(NA) NOT AVAILABLE.

NOTE: DATA FOR SUCCEEDING CENSUSES ARE NOT COMPLETELY COMPARABLE BECAUSE OF CHANGES IN CLASSIFICATION OF ESTABLISHMENTS AND COVERAGE. PLEASE SEE THE EXPLANATION IN THE INTRODUCTION TO SECTION 18.00.

TOURISM AND RECREATION

Tourism is widely regarded as one of Florida's major economic activities. Indeed it is but, unfortunately for students of the state's economy, there is no such thing as a tourist industry. There are many firms in a number of different industries which derive a greater or lesser proportion of their receipts or sales from tourists. A person wanting to construct a model of tourism for Florida must put together a structure from many bits and pieces. The editors have attempted to bring together in Section 19.00 a number of these bits and pieces, leaving it to the reader to utilize them as he or she sees fit.

Information collected for the 1977 Census of Transportation: Travel During 1977 was published in the 1980 Florida Statistical Abstract. An index of census tables appearing in previous Abstracts appears at the back of this book. A Survey of the Impact of Travel on State Economies came from the U.S. Travel Data Center, and information from it is published with their permission.

Data on employment in tourist and recreation-related industries come from the Bureau of Research and Analysis, Division of Employment Security, Florida Department of Labor and Employment Security.

The Division of Tourism of the Florida Department of Commerce issues quarterly and county reports of tourist information and an annual report, Executive Summary: Florida Tourist Study. It also supplied the unpublished results of a survey of Florida's top festivals and events. Tourist facilities include hotels, motels, and food service establishments which are regulated by the Division of Hotels and Restaurants of the Florida Department of Business Regulation. The Florida Revenue Department provides information on the sales of tourist-related businesses. Some of these data are in Section 16.00 and are repeated here. The Department of Revenue also provides information on the tourist-development or local option tax collected in 10 counties.

Data on boats registered by county in Florida are provided by the Department of Natural Resources, Division of Recreation and Parks. This agency also issues information on the nature, size, and popularity of state parks. Data on national parks in Florida were abstracted from the National Park Statistical Abstract, published by the National Park Service of the U.S. Department of the Interior.

The Florida Department of Natural Resources has issued Outdoor Recreation in Florida, an inventory of recreation resources and facilities. Regional information and projections of need for 1985 and 1990 are included in the source.

The Division of Transportation Planning of the Florida Department of Transporation records traffic counts at strategic highway locations around the state. Estimates of the number of tourists entering Florida by automobile are made by the Florida Division of Tourism using these traffic counts and information from welcome stations. Tourist arrivals by air are based on arrivals at major airports. Estimates utilize a tourist base established in 1973 and updated annually. Individual visitors are interviewed on a randomly selected basis about, expenditures and length of stay. Sample results are expanded to the total visitor population.

1/ A USER-OCCASION IS GENERATED EACH TIME AN INDIVIDUAL PARTICIPATES IN A GIVEN OUTDOOR RECREATION ACTIVITY. 2/ THE NUMBER OF TIMES EACH INDIVIDUAL, ON THE AVERAGE, PARTICIPATES IN AN ACTIVITY. 3/ INDICATES HOW MANY DIFFERENT INDIVIDUALS PARTICIPATED IN EACH ACTIVITY.

NOTE: THESE DATA COME FROM SURVEYS OF RESIDENTS AND TOURISTS CONDUCTED BETWEEN APRIL 1978 AND MARCH 1979. THE INFORMATION COLLECTED WAS EXPANDED TO REPRESENT THE PARTICIPATION PATTERNS OF THE TOTAL RESIDENT (ABOUT 8,936,000) AND TOURIST (32,500,000) POPULATIONS. THE SOURCE CONTAINS REGIONAL INFORMATION AND PROJECTIONS FOR 1985 AND 1990.

SOURCE: STATE OF FLORIDA, DEPARTMENT OF NATURAL RESOURCES, DIVISION OF RECREATION AND PARKS, OUTDOOR RECREATION IN FLORIDA, 1981.

HEALTH, EDUCATION, AND CULTURAL SERVICES

Data in this section are to be differentiated from those in Section 3.00, Vital Statistics and Health, and Section 4.00, Education, in that here the concern is with the establishments and employees who perform the included services and the financial aspects involved. In the above sections the concern is with the availability of services to the people of Florida and their utilization of them.

Services covered herein are medical and health (SIC code 80), educational (SIC code 82), and museums and botanical and zoological gardens (SIC code 84).

Data on employment are from the covered employment and payroll figures supplied by the Bureau of Research and Analysis, Division of Employment Security of the Florida Department of Labor and Employment Security.

Information on physicians, dentists, nurses, other licensed health service practitioners and professionals comes from the Department of Professional Regulation, State of Florida. Dispensing opticians and pharmacists will be found in Section 16.00 since they are usually involved in retail trade.

Bed capacity of licensed hospitals and nursing homes is reported by the Office of Licensure and Certification in the Florida Department of Health and Rehabilitative Services.

Health, United States is an annual publication of the U.S. Public Health Service and contains national and some regional and state data on health facilities and services.

Educational establishment information comes from the Florida Department of Education: the annual report of the Commissioner of Education, Profiles of Florida School Districts; the Division of Community Colleges of the Florida Department of Education, Report for Florida Community Colleges; the Division of Public Schools, MIS Statistical Briefs and MIS Statistical Reports; State Board of Independent Colleges and Universities, Annual Report; and the National Center for Educational Statistics of the U.S. Department of Education. Nonpublic school membership tables in this section last year have been moved to Section 4.00.

Library information is supplied by the Division of Library Services of the Florida Department of State in Florida Library Directory and Statistics.

Tables are included in this section which present data on public health expenditure. The source is the Association of State and Territorial Health Offices.

Data on veterans hospitals comes from the United States Veterans Administration, Annual Report.

1/ 1981-82 CONTRACT SIGNED; HOWEVER, NEGOTIATIONS HAVE BEEN REOPENED.

2/ 1980-81 SALARY RANGES. CONTRACT FOR 1981-82 UNDER NEGOTIATION.

NOTE: IT IS NOT POSSIBLE TO USE SALARY SCHEDULES TO COMPARE DISTRICTS BECAUSE INDIVIDUAL DISTRICTS ALLOW VARYING SALARY SUPPLEMENTS. THE SUPPLEMENTS WERE COMPUTED IN THE MAXIMUM WHEN IT WAS CLEAR IN WHICH CATEGORY IT WAS APPLICABLE.

GOVERNMENT AND ELECTIONS

Types of local government units and characteristics of the population of voting age are the subject of this section. A summary table is from the 1977 Census of Governments. These include numbers of local governmental units in Florida by county and by type. The number of elected officials is also shown. Other data from this Census appears in the 1979 Abstract. An index of Census tables appearing in previous Abstracts is at the back of this edition.

The Division of Elections in the Florida Department of State provides information on registered voters and numbers of votes cast. This year the data refer to the general election of 1980. Current figures on voting-age population are released annually by the Bureau of Economic and Business Research, University of Florida.

Federal civilian employment in Florida comes from the Annual Report of Employment by Geographic Area of the U.S. Office of Personnel Management.

The Bureau of the Census defines each of the different types of local government units as follows:

A county is an organized local government authorized and designated by a state's constitution or statutes.

A municipality is a political subdivision within which a municipal corporation has been established to provide general local government for a specific population concentrated in a defined area. In Florida they are called cities, towns, and villages and have been established either by special acts of the legislature or by general law.

A school district is an entity providing local public schools. There is an independent school district in each county in Florida and twenty-eight community college districts.

A special district has been established to perform one or more specific functions dealing with natural resources, housing, urban renewal, hospital, fire protection, libraries, or public transit. About one-third of the special districts in Florida have taxing power.

(D) DATA WITHHELD TO AVOID DISCLOSURE OF INFORMATION ABOUT INDIVIDUAL PERSONS.

1/ INCLUDES THE FOLLOWING CATEGORIES NOT LISTED SEPARATELY: ASIAN AND PACIFIC ISLANDER GROUPS NOT IDENTIFIED SEPARATELY; PERSONS REPORTING AS MEXICAN, CUBAN, SOUTH AMERICAN, CHICANO, OR LA RAZ; AND OTHER RACES NOT LISTED SPECIFICALLY ON THE QUESTIONNAIRE.

2/ IN 1980 PERSONS WHO DID NOT CLASSIFY THEMSELVES IN A SPECIFIC RACE CATEGORY BUT REPORTED THEMSELVES AS CUBAN, PUERTO RICAN, MEXICAN, OR DOMINICAN WERE INCLUDED IN "OTHER," A CATEGORY NOT LISTED SEPARATELY ON THIS TABLE. IN 1970 MOST OF THESE PERSONS WERE INCLUDED IN "WHITE."

3/ INCLUDES JAPANESE, CHINESE, FILIPINO, KOREAN, ASIAN INDIAN, VIETNAMESE, HAWAIIAN, GUAMANIAN, OR SAMOAN.

4/ INCLUDES THOSE WHO CLASSIFIED THEMSELVES AS MEXICAN, PUERTO RICAN, OR CUBAN AND THOSE WHO INDICATED THAT THEY WERE OF OTHER SPANISH/HISPANIC ORIGIN. PERSONS OF SPANISH ORIGIN MAY BE OF ANY RACE.

NOTE: COUNTS OF POPULATION BY RACE AND SPANISH ORIGIN ARE PROVISIONAL. FINAL COUNTS WILL BE DETERMINED AFTER SAMPLE DATA HAVE BEEN PROCESSED.

COURTS AND LAW ENFORCEMENT

Data on criminal offenses are subject to certain limitations. Many crimes are not reported to law enforcement agencies and hence are not counted in preparing crime statistics. Victims may report crimes to prosecuting authorities rather than to law enforcement agencies. Others think there is no use in reporting crimes because nothing can be done about them. Still other victims may have shared in such offenses as illegal sex acts, gambling, or drug usage.

The principal source of data on crimes and criminals in Florida is the annual report of the State Department of Criminal Law Enforcement, Crime in Florida. For the purposes of crime statistics the Florida population has been grouped into five community types: metropolitan (cities over 250,000 population), cities (cities of 50,000 to 250,000 population), suburban (cities under 50,000 population and unincorporated jurisdictions in SMSA counties), nonsuburban (cities under 50,000 population in nonSMSA counties), and rural (unincorporated areas in nonSMSA counties). See the introduction for a discussion of SMSAs (standard metropolitan statistical areas). Table 22.05 presents information for these community types.

Offenses included on tables in this section include murder, manslaughter, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft. Not included in these statistics are arson, forgery, fraud, embezzlement, prostitution, narcotic and drug violations, gambling, etc.

An additional factor to consider when studying crime rates in Florida is the presence of large numbers of tourists. The crime rates in this section present are based on resident population. When adjustments are made for the tourist presence, the crime rate in Florida for 1981 drops from 8,085 per 100,000 persons to 7,990 per 100,000 persons. Crime in Florida gives modified crime rates for all Florida counties.

Other sources on the criminal justice system include publications of several divisions of the U.S. Department of Justice: Crime in the United States, by the Federal Bureau of Investigation; National Prisoners Statistics Bulletin: Capital Punishment by the Bureau of Justice Statistics, U.S. Department of Justice; and Expenditure and Employment Data for the Criminal Justice System from the same source.

Data on legal services come from the Florida Bar and the Florida Division of Employment Security, Bureau of Research and Analysis.

Prison and prisoner information is made available by the Federal Bureau of Prisons of the U.S. Department of Justice in its Statistical Report and the Florida Department of Corrections, Annual Report.

TABLE 22.03. CRIMINAL OFFENSES: CRIME INDEX OFFENSES BY TYPE OF OFFENSE IN FLORIDA 1978 THROUGH 1981

1/ ACTUAL OFFENSES KNOWN TO LAW ENFORCEMENT OFFICERS, NOT THE NUMBER OF PERSONS WHO COMMITTED THEM OR NUMBER OF INJURIES THEY CAUSED.

2/ INCLUDES MURDER, FORCIBLE RAPE, ROBBERY, AND AGGRAVATED ASSAULT.

3/ INCLUDES BREAKING AND ENTERING (BURGLARY), LARCENY, AND AUTO THEFT.

4/ CLEARANCE OF AN OFFENSE OCCURS WHEN AN OFFENDER IS IDENTIFIED, CHARGED, AND TAKEN INTO CUSTODY, OR OCCASIONALLY WHEN SOME ELEMENT BEYOND LAW ENFORCEMENT CONTROL PRECLUDES FORMAL CHARGES AGAINST THE OFFENDER.

NOTE: DATA ARE AGGREGATES OF OFFENSES REPORTED TO MUNICIPAL, COUNTY, AND STATE LAW ENFORCEMENT AGENCIES AND CAMPUS POLICE DEPARTMENTS.

SOURCE: STATE OF FLORIDA, DEPARTMENT OF LAW ENFORCEMENT, CRIME IN FLORIDA: 1981 ANNUAL REPORT.

GOVERNMENT FINANCE AND EMPLOYMENT

State and local governments are not only important from political and social viewpoints, but their economic impact is considerable.

The U.S. Bureau of the Census publishes a number of individual reports, including *State Government Finances*, *City Government Finances*, *Public Employment*, *Finances of Employee-Retirement Systems*, *Labor-Management Relations in State and Local Governments*, and *Governmental Finances and Employment*. The Bureau of the Census also has published *Local Government in Selected Metropolitan Areas and Large Counties*, and *Environmental Quality Control*. Basic data from the 1977 Census of Governments relating to finance and employment will be found in the *1980 Florida Statistical Abstract*. An index of tables in previous *Abstracts* appears at the end of this book. The U.S. Community Services Administration releases *Geographic Distribution of Federal Funds* (formerly *Federal Outlays*).

Official records and reports of the Comptroller of the State of Florida form the basic source of information about government finances in Florida and are published in the *Annual Report of the Comptroller*. Although the official records of the Comptroller are used by the Bureau of the Census in its compilations on state and local government finances, the Bureau of the Census has found it necessary at times to classify and present the government financial statistics in terms of its own system of uniform concepts and categories rather than according to the diverse terminology and structure of individual governments. This procedure explains the differences which may be found between similar data from the two sources.

Other State of Florida sources of data on government finances and employment include the Department of Revenue, *Florida Ad Valorem Valuations and Tax Data*; the Department of Business Regulation, for data on pari-mutuel wagering and beverage licenses; *The Report of the State Treasurer*; the Division of Employment Security on employment and payroll; and the Division of Retirement, *Annual Report*. A number of tables this year use as a source *Local Government Financial Report* put out by the Florida Department of Banking and Finance.

The Citizens Council for Budget Research has provided a *Research Report* comparing state appropriations with the consumer price index, population, and personal income. The Governor's Office publishes *Florida's Ten-Year Summary of Appropriations Data*.

A number of tables in the Health, Education, and Cultural Services Section (20.00) contain data on property valuations, revenue, expenditure, and taxes for education by public agencies. Table 19.67 in Section 19.00 provides figures on the tourist development/local option tax collected by 10 counties.

TABLE 23.07. FEDERAL AID TO STATE AND LOCAL GOVERNMENTS: GRANTS AND PAYMENTS MADE TO STATE AND LOCAL GOVERNMENTAL UNITS, ESTABLISHED PUBLIC BODIES, AND THEIR DESIGNEES BY FEDERAL AGENCIES WITH OUTLAYS OF AT LEAST $1,000,000 IN FLORIDA, FISCAL YEAR 1978-79

ECONOMIC INDICATORS AND PRICES

Most of the tables in the Abstract are cross-sectional or "snapshot" portrayals of the situation existing at any one time. Many readers are interested in charting trends over time. This section should help them.

The basic series of economic indicators for Florida is prepared by the Bureau of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security and is presented in Table 24.12.

Sales and sales taxes paid is a series that results from the operation of the Department of Revenue of the State of Florida. A source of banking data is the State of Florida, Division of Banking.

Consumer price indexes are the work of the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor and appear in the Monthly Labor Review, Handbook of Labor Statistics, and in the U.S. Department of Commerce publication Survey of Current Business. The BLS publishes two indexes: one reflectig the buying habits of all urban households (CPI-U) and one reflecting the buying habits of urban wage earners and clerical workers (CPI-W). Both indexes are comparable with historical CPI figures; the index for all urban households is used in tables in this section (except for the entry of the CPI-W index on Table 24.72). It is based on information reflecting the buying habits of about 80 percent of the U.S. population and represents all urban residents, including professional workers, the self-employed, the poor, the unemployed, and retired persons. Not included are persons living outside urban areas, farm families, persons in military services, and those in institutions.

In addition, the Department of Economics of the University of North Florida in cooperation with the Florida Times-Union has developed a consumer price index for Jacksonville. They have graciously allowed the Florida Statistical Abstract to present it in this section, Table 24.66. The Bureau of Labor Statistics issues a quarterly CPI for Miami.

A publication of the U.S. Bureau of Labor Statistics called News presents the estimates of family budgets for various cities and the relative weights of items in the consumer price index. It also makes available an index of consumer prices for energy. The budgets are presented in Section 5.00. Price level indexes for the counties of Florida are prepared and released by the state Governor's Office.

The series of producer prices appears in Table 24.70. According to the U.S. Bureau of Labor Statistics, this series measures the average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. The sample used for calculating the indexes contains nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the agriculture, forestry, fishing, mining, manufacturing, gas, electricity, and all public utility sectors.

Data on price trends in construction will be found in Section 11.00, and indexes of prices received by fishermen in Section 10.00.

1/ ANNUAL TOTAL REFLECTS REVISIONS NOT DISTRIBUTED TO MONTHS.

NOTE: TO ARRIVE AT STATE TOTALS, DATA FOR SMSAS WERE TAKEN FROM REPORTS SUBMITTED BY ALL PLACES WITHIN THESE AREAS. ESTIMATES OF THE DATA FOR NONSMSA PLACES IN FLORIDA AND THE UNITED STATES WERE BASED ON SAMPLE SELECTION OF PERMIT-ISSUING PLACES. THERE WERE IN THE UNITED STATES 13,000 SUCH PLACES PRIOR TO 1973, AND 14,000 FROM 1973 TO 1978. BEGINNING IN 1979 A NATIONAL UNIVERSE OF 16,000 PERMIT-ISSUING PLACES HAS BEEN USED.

SOURCE: U.S., DEPARTMENT OF COMMERCE, BUREAU OF INDUSTRIAL ECONOMICS, CONSTRUCTION REVIEW, MARCH 1981, AND PREVIOUS EDITIONS.

NOTE: THESE SALES WERE REPORTED TO THE DEPARTMENT OF REVENUE FOR THE 4 PERCENT REGULAR SALES TAX, THE 4 PERCENT USE TAX, AND THE 3 PERCENT VEHICLE AND FARM EQUIPMENT SALES TAX FROM JANUARY TO DECEMBER OF EACH YEAR. THE SALES OCCURRED, FOR THE MOST PART, FROM DECEMBER OF THE PREVIOUS YEAR THROUGH NOVEMBER OF THE POSTED YEAR. THESE DATA ARE NOT COMPARABLE WITH RETAIL SALES FIGURES REPORTED BY THE BUREAU OF THE CENSUS OR THOSE ESTIMATED BY THIS BUREAU PRIOR TO 1970 BECAUSE OF DIFFERENCES IN DEFINITIONS OF RETAILERS AND RETAIL SALES. IN JULY 1967, CHANGES WERE MADE IN THE LAW WHICH INCREASED THE NUMBER OF KINDS OF ITEMS SUBJECT TO SALES TAXES.

SOURCE: STATE OF FLORIDA, DEPARTMENT OF REVENUE, SALES TAX TOTALS BY KIND--CALENDAR YEAR ENDING DECEMBER 31, 1981, AND PREVIOUS EDITIONS.

NOTE: THE FLORIDA PRICE LEVEL INDEX IS A SET OF NUMBERS WHICH REFLECTS THE PRICE LEVEL IN EACH COUNTY RELATIVE TO POPULATION-WEIGHTED STATEWIDE AVERAGE (100 FOR EACH CATEGORY) FOR A PARTICULAR POINT IN TIME, OCTOBER 1981. IT MEASURES PRICE LEVEL DIFFERENCES FROM PLACE TO PLACE IN CONTRAST TO THE CONSUMER PRICE INDEX PREPARED BY THE U.S. BUREAU OF LABOR STATISTICS, WHICH MEASURES PRICE LEVEL CHANGES FROM MONTH TO MONTH. THE BASIS FOR THESE COMPARISONS IS ONE FIXED STANDARD OF LIVING WHICH REPRESENTS THE CONSUMPTION PATTERNS OF A TYPICAL WAGE EARNER OR CLERICAL WORKER. THE INDEX MEASURES IN EACH COUNTY THE RELATIVE COST OF LIVING BY THIS STANDARD. SEE TABLE 24.77 FOR RELATIVE WEIGHTS OF ITEMS PRICED.

QUALITY OF LIFE

The quality of life is a highly abstract concept that cannot be measured directly. However, by defining those factors that determine the quality of life and measuring the corresponding social indicators, comparisons of the quality of life in different places may be made. Furthermore, by updating these measures from time to time, progress or regress in the conditions of living in one area may be computed.

Traditionally, it has been assumed that the only sound indicators of any value were such measures of economic prowess as gross national product or personal income. But in today's highly complex society there are many characteristics of the environment that the affluent can change no more easily than those with fewer financial resources. A list of both economic and noneconomic factors that most people would accept as representing determinants of the quality of life can be classified by such broad categories as community living conditions, personal achievements, and environmental factors. Within these sections specific indicators are grouped into such divisions as health, education, income, employment, welfare, climate, economic conditions, public safety, governmental environment, and the health and cultural environments.

In Table 25.01 indicators were selected to permit the reader to compare the quality of life in Florida with that in other states in the Sunbelt and with other populous states in other sections of the country. In Table 25.02 are indicators of the relative quality of living in one or another of the standard metropolitan statistical areas (SMSAs) within the state. See the front of the book for a map and the introduction to Section 1.00 for a discussion of SMSAs.

Those interested in comparing Florida with all fifty states or in determining how the metropolitan areas here fit into the national picture are referred to the following publications: (1) Federal Statistical System and U.S. Bureau of the Census, *Social Indicators, III* (1980); (2) U.S. Environmental Protection Agency, Washington Environmental Research Center, *Quality of Life Indictors in U.S. Metropolitan Areas, 1970*; (3) Ben-Chieh Liu, *The Quality of Life in the United States, 1970*; and (4) *Quality of Life Indicators in the U.S. Metropolitan Areas, 1970*. Item 1 is obtainable from the U.S. Government Printing Office, item 2 from the source indicated, and items 3 and 4 from the Midwest Research Institute, 425 Volker Boulevard, Kansas City, Missouri 64110.

GUIDE TO SOURCES

The Florida Statistical Abstract is an abstract. It presents as much statistical information as possible in tabular form, but it is also a guide book to the sources from which the statistics have been taken. In almost every instance more detail exists in the source than can be included in the Abstract, and sometimes the issuing agency has additional data or perhaps more recent information by the time Abstract reaches the user. Where does the user find the sources used in this abstract? Most of them are as close as the telephone or the nearest library.

State sources. Most of the state publications are available free of charge from the agency which issues the report. Supplies are freqently limited and sometimes requests cannot be honored unless they come from other state agencies. The state has a system of state depository libraries, coordinated by the Division of Library Services, Florida Department of State, R.A. Gray Building, Tallahassee 32304. All state agency publications are supposed to be on file in depository libraries or available for interlibrary loan. The reference departments of most libraries are willing to answer questions about data in these publications if the requests are not too time-consuming. The Florida Division of State Library Services issues a monthly and annual summary of state agency publications called Florida Public Documents.

Depository libraries of the State of Florida include the public libraries of Bay and Broward counties, Cocoa, Jacksonville, Miami Beach, Miami, Ocala, Orlando, St. Petersburg, Tampa, and West Palm Beach. University libraries designated as depositories are those at Florida Atlantic, Florida International, Central Florida, Florida State, Stetson, Jacksonville, Florida (Gainesville), Miami, North Florida, South Florida, and West Florida universities. The library at Miami-Dade Community College and the State Library of Florida in the R.A. Gray Building in Tallahassee also are depositories.

Federal sources. Some federal reports are available without charge from the agency which issues the information, but most federal publications must be purchased from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402 (phone 202/783-3238) or from a local Government Printing Office bookstore. Publications purchased from the GPO must be paid for in advance. The Statistical Abstract of the United States is similar in purpose to the Florida Statistical Abstract. Readers who are interested in information about the nation, its regions, and states are referred to it.

The federal government also maintains a system of depository libraries in all 50 states, usually the same libraries as state depositories. The University of Florida is designated as a regional depository library and is required to receive and retain one copy of all depository government publications made available to depository libraries either in printed or microfacsimile form.

Private sources. A number of private agencies and associations issue publications or reports which have been used in this edition of Abstract. Some are copyrighted and have been used with permission. Several have additional information which can be obtained for a fee. The following is a partial list of agencies and addresses:

U.S. Travel Data Center, 1899 L Street, N.W., Suite 610, Washington, D.C. 20036
Florida Savings and Loan League, P.O. Box 2246, Orlando, Florida 32802
U.S. League of Savings Associations, 111 E. Wacker Drive, Chicago, Illinois 60601
American Forest Institute, 1619 Massachusetts Avenue, N.W., Washington, D.C. 20036
Tax Foundation, Inc., 1875 Connecticut Avenue, N.W., Washington, D.C. 20009
American Gas Association, Department of Statistics, 1515 Wilson Boulevard, Arlington, Virginia 22209
Association of American Railroads, 1920 L Street, N.W., Washington, D.C. 20036
Editor and Publisher, 575 Lexington Avenue, New York, New York 10022
Broadcasting, 1735 DeSales Street, N.W., Washington, D.C. 20036
Health Insurance Association of America, 1850 K Street, N.W., Washington, D.C. 20006
Insurance Information Institute, 110 William Street, New York, New York 10038
American Council of Life Insurance, 1850 K Street, N.W., Washington, D.C. 20006
Federal Deposit Insurance Corporation, 550 17th Street N.W., Washington, D.C. 20429
Florida Association of Realtors, P.O. Box 1231, Orlando, Florida 32802
Citizens Council for Budget Research, Inc., 201 S. Monroe Street, Suite 400, Tallahassee, Florida 32301

Computer tapes. Much of the information in Abstract is available from the Bureau of Economic and Business Research on computer tape.

The University of Florida Library in Gainesville maintains an extensive collection of information of and about Florida in books, in files, and on computer tapes. All the data from the population, housing, and economic censuses can be accessed from their computer tapes.

Bureau publications. The Bureau of Economic and Business Research can supply a variety of detailed information about Florida.

Population estimates for the state and its minor civil districts are made each year and published in Florida Estimates of Population. Four times a year Population Studies is issued which provides such information as forecasts, age, race, and sex components.

Building Permit Activity is a monthly, quarterly, and annual compilation of permits issued by municipal and county issuing agencies throughout the state.

Gross and taxable sales data by type of business and by county are supplied to the Bureau by the Department of Revenue of the State of Florida and are available on a subscription basis.

The Bureau also publishes The Florida Outlook (a quarterly forecast of the Florida economy), Business and Economic Dimensions, and Economic Leaflets.

For prices and more information about these publications and services contact the Bureau of Economic and Business Research of the University of Florida, Gainesville, FL 32611.

INDEX OF CENSUS TABLES

THE U.S. BUREAU OF THE CENSUS CONDUCTS VARIOUS CENSUSES AT REGULAR INTERVALS. THIS INDEX LISTS TABLES FROM PREVIOUS *FLORIDA STATISTICAL ABSTRACTS* WHICH INCLUDE DATA FROM THESE CENSUSES. ALL TABLES WITH DATA FROM THE CENSUS OF POPULATION AND HOUSING APPEARING IN PREVIOUS *ABSTRACTS* ARE INCLUDED HERE. FOR OTHER CENSUSES, ONLY THE ONE OR TWO MOST RECENT CENSUSES ARE INDEXED. NO TABLES IN THE 1982 EDITION OF *ABSTRACT* ARE INCLUDED HERE.
